

TERMINAL BLOCKS

88X-(XXX)C

Terminal Block with RJ21/Wire Wrap Termination

Up To 256 Pair Wire-Wrap
Output Termination For
Maximum Density

CAT5 Rated Performance
for Superior Transmission
of DSL and Other High
Frequency Applications

RJ21 Connectorized Input
Field Allows Easy
Connection of Equipment

Mounting Bracket Included
For Easy Installation

88-(XXX)C Equipment Terminal Blocks are used to terminate the exchange equipment pairs on the horizontal side of a conventional main distribution frame (MDF), and provide the cross-connect field for jumpering to the Outside Plant (OSP) vertical side of the frame. They also feature CAT5 compliance for superior transmission of DSL signals and other high frequency circuits.

KEY PRODUCT BENEFITS

- ▶ Eight-inch block accommodates most conventional horizontal frame mounting configurations
- ▶ Mounting bracket included for easy installation
- ▶ RJ21 connectorized input field to allow easy connection of equipment
- ▶ Up to 256-pair wire-wrap output termination provides maximum density
- ▶ Complies with Telcordia specifications
- ▶ Special housing allows neat and organized administration of the incoming cross-connect pairs
- ▶ Flat face allows use in tight quarters such as cabinets and vaults
- ▶ Internal twisted pair wiring provides CAT5 rated performance for superior transmission of DSL and other high frequency applications
- ▶ Ample designation areas on both front and back of the cover
- ▶ Designation label included

SPECIFICATIONS

Pair Count

100-256

Dimensions (HxWxD)

4.2" x 8.0" x 6.4" (10.67 cm x 20.32 cm x 16.26 cm)

COMMON CONFIGURATIONS

Model No.	Pair Count	Input	Output
88-100CM	100	25-Pair RJ21 (Male)	Wire Wrap
88-128CM	128	32-Pair RJ21 (Male)	Wire Wrap
88-150CM	150	25-Pair RJ21 (Male)	Wire Wrap
88-192CM	192	32-Pair RJ21 (Male)	Wire Wrap
88-200CM	200	25-Pair RJ21 (Male)	Wire Wrap
88-256CM	256	32-Pair RJ21 (Male)	Wire Wrap
