

tii 759 & tii 760

One and Two Pair Network Interface Devices

Customer Security Lock with Telco Override

Field Replaceable Parts

Can be Field Upgraded

Reduces Labor Costs and Inventory

Listed to UL 497

tii 759

tii 760

The tii 759 and 760 Network Interface Devices enable you to take a one- or two-pair station protector and add a subscriber network interface.

KEY PRODUCT BENEFITS

- ▶ The tii 759 converts a one- or two-pair station protector housed in a "B" Service Closure.
- ▶ The tii 760 can replace the existing cover of a tii 325, 326, 320 or 321 one- or two-pair station protector to add a subscriber network interface.
- ▶ The tii 760 can also retrofit 123 or 128 type station protector to add a subscriber network interface.
- ▶ Both models are compatible with a wide range of station electronics.
- ▶ Both models can be field upgraded from one-line to two-line protection.
- ▶ RJ-11 jack and customer bridge assemblies are replaceable.
- ▶ Both models provide a locking device for customer security and Telco override capability.

INDUSTRY STANDARDS

- ▶ Listed to UL 497.
