

## OPTIPOP

### US Conec Ferrule Cleaning Cassette

Prevent Fiber  
Endface Damage!

Densely Woven, Anti-Static  
Micro-fiber Cleaning Fabric

Specifically Designed to  
Clean Singel Fiber Duplex,  
LC, MTO/MPO Male,  
MTRJ Male and Hardened  
Fiber Connectors

The US Conec OPTIPOP is a refillable cassette style fiber optic connector cleaner system. It uses a densely woven micro-fiber cleaning fabric to remove harmful contaminants from the ferrule end face. The anti-static cloth material produces a pristine fiber tip and minimizes contaminant attraction. The cleaning fabric is pre-washed and produces less than 70 pcs/CFM of particles > 1mm in size, making this system excellent for use in any production environment including clean rooms. The OPTIPOP is available in 5 versions that are designed specially for cleaning single fiber connections, duplex LC, MTP/MPO male, MTRJ male and hardened fiber connectors.

### KEY PRODUCT BENEFITS

- ▶ Easy to install replacement reels
- ▶ Eliminates electrostatic charge
- ▶ Ultra clean micro-fiber cloth captures debris and contamination
- ▶ 400+ cleanings per reel

### ORDERING INFORMATION

Model No.	Description	Application
<b>6338</b>	Single Slot	FC, LC, MU, SC, ST, E2000, SMA, MTRJ, MTP/MPO
<b>6437</b>	Two Slot	LC Duplex
<b>6339</b>	MTO Male	MTP/MPO Male (with guide pins)
<b>6340</b>	MTRJ Male	MTRJ Male (with guide pins)
<b>8057</b>	HFC	Hardened fiber connector FTTH drop cables
<b>6232</b>	Refill	Universal refill reel for all OPTIPOP R Cassettes
