

INSTALLATION NOTE

TII 150C

1. GENERAL

1.1 The 150C Subscriber Protector Cover is specifically designed as a direct replacement for the WE150B soft plastic (neoprene) cover. This replacement unit provides existing or newly installed subscriber protector blocks with a superior protective cover.

2.0 WARRANTY

2.1 See TII Warranty. If unit fails within warranty period, the factory shall be requested to authorize return. Return the unit prepaid. Units which fail through normal wear and tear or abuse should be discarded.

3. INSTALLATION

- 3.1 Remove and appropriately discard the WE150B soft plastic cover.
- 3.2 Unpack 150C Subscriber Protector Cover and prepare grommet for wire entry.
- 3.3 Locate the plastic security hex nut, located on the top of the cover and align it with the protector base ground stud.
- 3.4 Carefully turn the security hex nut until cover is secure to base and mounting surface.
- 3.5 Care should be taken in routing and placing existing drop and customer wire within the new cover.
- 3.6 Perform approved / customary testing as required.
