

INSTALLATION NOTE

TII 80-400

1. DESCRIPTION

- 1.1 The TII Series 80-400 is an ADSL Splitter / Filter. It is a passive in-line device designed to let through POTS (Plain Old Telephone Service) while blocking the Asymmetric Digital Subscriber Line (ADSL) signals.
- 1.2 The TII Series 80-400 has a second unfiltered RJ-11 port for connection to DSL modems and Home Phone Network (HPN) services.

2. WARRANTY

- 2.1 See TII Warranty. If this unit fails during the warranty period, the factory should be requested to authorize return. Return the unit prepaid when authorization is received. Units that fail due to abuse or normal wear should be discarded.

3. INSTALLATION

- 3.1 Identify the location where the existing phone line is installed.
- 3.2 Disconnect the existing telephone cable from the wall jack to telephone (See Figure 1).

Figure 1 Existing Telephone Connections

- 3.3 Insert the RJ-11 plug of the TII 80-400 (Line) into the RJ-11 jack of the wall outlet (Figure 2).
- 3.4 Reconnect the telephone cable from the Telephone (Input) to the RJ-11 on the TII 80-400 (Phone).
- 3.5 Insert the DSL modem RJ-11 plug into the RJ-11 labeled DSL Modem on the 80-400. (Figures 2)
- 3.6 Perform necessary tests to confirm that the computer communicates with the DSL modem.
- 3.7 Use adhesive pad (supplied) to attach the TII 80-400 to the wall.
