Model WM8PBF

WALL MOUNT PATCH & SPLICE FIBER ENCLOSURE

Installation Note

Description

Wall mount fiber distribution unit designed to support patching and splicing in one unit. The enclosure has 8 adapter panel positions, allowing for a wide variety of fiber termination connector types. Two compartments separate the network terminations from the distribution terminations and the unit has a single outer door with optional key lock.

Features

Installation

The WM8PBF is designed for indoor installation. It can be ordered empty and configured on-site or factory loaded with adapter plates, pigtails and splice trays to reduce the installation time.

- Select a vertical indoor wall surface with easy access and adequate clearance from other fixtures and power circuits. Near a suitable earth ground.
- 2. Utilize a plywood backer board or fastener anchors as appropriate to the install surface.

3. Mark and install appropriate wall hanging hardware and secure the unit.
