**Model WM08BT**  
WALL MOUNT PATCH & SPLICE FIBER ENCLOSURE

## Installation Note

### Description

Wallmount fiber distribution unit designed to support patching and splicing in one unit. The enclosure has 8 adapter panel positions, allowing for a wide variety of fiber termination connector types. Two compartments separate the network terminations from the distribution terminations and the unit has two outer doors with key lock.

### Features

### Installation

The WM08BT is designed for indoor installation. It can be ordered empty and configured on-site or factory

loaded with adapter plates, pigtailed and splice trays to reduce the installation time.

1. Select a vertical indoor wall surface with easy access and adequate clearance from other fixtures and power circuits. Near a suitable earth ground.
2. Utilize a plywood backer board or fastener anchors as appropriate to the install surface.

3. Mark and install appropriate wall hanging hardware and secure the unit.
